

flight testing of fixed pdf

However, its principal emphasis is on propeller-driven aircraft, because much of the methodology for testing of propeller-driven aircraft has been lost with time. The book is intended as a text for those teaching courses in fixed-wing flight testing. It is also a reference for those involved in flight test on a daily basis or those who need knowledge of flight testing to manage those activities. The book is divided into three sections. The first two sections--Performance, and Stability and ...
