Overview. The soundness test determines an aggregate's resistance to disintegration by weathering and, in particular, freeze-thaw cycles. Aggregates that are durable (resistant to weathering) are less likely to degrade in the field and cause premature HMA pavement distress and potentially, failure.

### **Durability and Soundness - Pavement Interactive**

1. Introduction. The performance of cement concrete pavement depends largely upon how well the joint was constructed. The joint function is greatly related to the dowel bars . Three main damage types of cement

concrete pavement (slabcracking, faulting and joint deficiencies) are all relevant with dowel bars.

### **Optimal design on dowel length for cement concrete pavement**
