Sine, cosine, and tangent. The sine of an angle is the ratio of the length of the opposite side to the length of the hypotenuse. The word comes from the Latin sinus for gulf or bay, since, given a unit circle, it is the side of the triangle on which the angle opens.

IV. Calculating Fourier Series. In this section we calculate several Fourier series. As we know, to find a Fourier series simply means calculating various integrals, which can often be done with software or with integral tables.

IV. Calculating Fourier Series - Mathphysics.com

In this section we solve linear first order differential equations, i.e. differential equations in the form $y' + p(t)y = g(t)$. We give an in depth overview of the process used to solve this type of differential equation as well as a derivation of the formula needed for the integrating factor used in the solution process.
